

## Material World Activity

In your notebook, compile the following information:

- Count the number of possessions in your bedroom. Each item counts as one, even if you have multiple of it.
  - NOTE: you need to have a final number. DO NOT create a list of everything. Instead, count the items in one area of the room, write that number down. Count another area, write that number down. Add up all the numbers at the end.
- Estimate how many possessions are in your house?
- What is your MOST valued non-living possession? Why?
